

## Controlled Exposure

### Shell Overmitts & Gloves – CE75

**Sewing Skill:** Level 2 - Easy

These are unlined weather shells for your gloves or mittens. Keeping the shells separate allows you to replace wet liners as needed or simply adjust the warmth of your underlayers to suit the conditions. Unlike “2 dimensional” overmitts that are flat and awkward, these are sculpted to fit the hand comfortably in a slightly curved finger position.

Both, the wrist strap and elasticized cord in the gauntlet, are easy to adjust one-handed. Section inside describes matting these sells to Controlled Exposure #45 Fleece Gloves using Hook & Loop.

#### Features:

- Five sizes cover hands ranging from 6" to 8-1/2" long
- Curved finger area for anatomic fit
- Adjustable strap across back of wrist
- On hand operation cord and toggle seals off gauntlet.

#### Suggested Fabrics

View A / B Shell Fabrics

Waterproof shell: Waterproof Breathable, Coated Oxford, 330 Denier Cordura
