

## Controlled Exposure

### Fleece Gloves – CE45

Multi size pattern.

Hands aren't flat. Gloves that are must be stretched out of shape simply to put on. This stresses seams and cause constrictions in what might otherwise be a good fit. These gloves use curved finger inserts and differentially cut palm and backhand pieces for a more natural, relaxed fit in a position you can use.

**View A** is a Fleece Glove with a stretch cuff. Soft, simple, stretchy and forgiving in sizing.

**View B** is a Shelled Fleece Glove also with a stretch cuff. The Fleece Liner is enclosed in a shell using two types of fabric. "Gripper" fabric is used on the palm sides while another woven fabric makes up the backhand. Still soft. Weather resistant. Warmer with terrific grip.

#### Suggested Fabrics

View A Fleece Glove/View B Fleece Liner: P200, Windblock, P300, P100

View B Shell – Palm Fabric: Grippy – Tuff Tech 9000

View B Shell – Backhand Fabric:
